Peru is a country located on the western side of South America between Chile and Ecuador. It also shares borders with Bolivia, Brazil, and Colombia and has a coastline along the South Pacific Ocean. Peru is the fifth most populous country in Latin America and it is known for its ancient history, varied topography, and multiethnic population.

Geographic Information About the Country of Peru

The world population illustrates a sex ratio of 102 males per 100 females. With record 85 males per 100 females, Latvia has the highest sex ratio in the world; on the other hand, in Qatar, there are 311 males per 100 females. The sex ratio is favorable for females in (about) 139 countries of the world and unfavorable in rest of the countries.

Geography World - Population - Tutorialspoint

That is not to diminish the value of this book, though. There is a lot to be learned from it, and it provides a good general view of the world. Sometimes there is a great value in simplicity. Anyone who knew everything in this book would certainly be geography-savvy, and would know far more about the world than 99+% of the population.

Due to the bulge of the earth at the Equator, the peak of Ecuador's Mount Chimborazo (20,700 feet or 6,310 meters) is the point farthest from the center of the Earth. Thus, the mountain claims the title of being the "highest point on Earth" (although Mt. Everest is still the highest point above sea level). Mt. Chimorazo is an extinct volcano and is about one degree south of the Equator.

Demographic Transition. Demography is the study of how human populations change over time and space. It is a branch of human geography related to population geography, which is the examination of the spatial distribution of human populations. Geographers study how populations grow and migrate, how people are distributed around the world, and how these distributions change over time.
