Hi. I have an LG LED Smart TV of model 42LS575T-ZD. It has an intermittent problem that I am so far unable to reproduce. Once in a while (and sometimes frequently within the same sitting) the backlight suddenly switches off entirely while the audio continues to play and the video can be seen faintly using the flashlight test.

I've just bought this tv LG 42LS575T and can't get my picture setting right, in fact the picture is awful, very grainy and if any text appears on the screen it's blurred and Pixelated. It's like this when watching Sky. It's an HD box and running through a new hdmi cable. I've also checked the Sky box output setting and this is at 1080.
