...

Hydrology is used to find out maximum probable flood at proposed sites e.g. Dams. The variation of water production from catchments can be calculated and described by hydrology. Engineering hydrology enables us to find out the relationship between a catchments's surface water and groundwater resources.

Uses And Applications of Hydrology in Engineering

Guide to Hydrological Practices Volume I Hydrology - From Measurement to Hydrological Information WMO-No. 168 Sixth edition 2008

Volume I Hydrological Information

Some of its probable values for different land uses (Mutreja, 1990; Subramanya, 1991) are presented in Table 1. The joint committee of the American Society of Civil Engineers and Water Pollution Control Federation has recommended values of runoff coefficient for a variety of land uses, soil types, and surface slopes (ASCE and WFCP, 1969).
