Geography of media and communication (also known as communication geography, media geography and geographies of media) is an interdisciplinary research area bringing together human geography with media studies and communication theory. Research addressing the geography of media and communication seeks to understand how acts of communication and the systems they depend on both shape and are shaped by geographical patterns and processes.

processual view of “communication as spatial production,” while also maintaining a complex view of space and spatial processes as both produced by and productive of communication in general and mediated practices in particular (Christensen et al., 2011). While some authors, most notably David Morley, have engaged a project of similar scope, we feel that conceptual structure is still lacking and effort must be directed not simply ...

### **Communication Geography: A Bridge Between Disciplines**

...

Peter Gould once defined communication as “everything from a kiss to an international shipment of grain” (Gould 1991, p. 3, cited under General Overviews). The study of communication has been more narrowly bounded by most other geographers, focusing in particular on the ways in which information, ideas, impressions, attitudes, preferences, emotions, and beliefs circulate through space, and, in a complementary strand, how
