For the laminating, there are a couple of tricks that help the process. One, add a layer of saran wrap on the top and bottom on molds. Use blue tape to help keep it in place (learned that the hard way). Two, once all the laminates and riser block are in place on the lower mold, quickly tape the riser in place.

Building a Laminated Long Bow : 8 Steps - Instructables

in a reflex, a deflex/reflex or a recurve bow. On the other hand these bows are of a well tempered nature and less sensitive to an improper shooting style. This is due to the fact that even glass laminated bows take a little set after they are glued up. So if a bow is glued up in a straight form it will have a slightly

How to build a laminated glass bow

Step 1: Step 1. Cut the laminates using a circular saw or a band saw. The dimensions of the belly laminate should be about 75" by 1 1/2" by 1", and the dimensions of the back laminate 75" by 1 1/2" by 3/16". The grain of the back laminate must run straight down the length of the board and be uncut.

Powerful Home Built DIY Recurve Bow | Vintage Projects

A recurve bow is a much simpler style of the bow than the more popular compound bow. The term "recurve" comes from the way the bow curves away from the shooter at the ends. This allows the bow to propel the arrow with more power and energy than a traditional straight-limbed bow. This makes the arrow go farther.

Build your own recurve bow plans by Davy Goedertier - Issuu

Hi Bingham! I've been building laminated wood bows for several years, and at the request of a friend earlier this spring I ordered a limb package (50#, 2"wide) and built him a 68" takedown recurve with bamboo and uniweft core, using your plans. It was very successful and we were both very happy with the results. Uli Lehnert
