Mercury tilt and trim fix

Open the hydraulic reservoir. The fluid should be level with the lowest threads on the filler neck. If not, add fluid until the fluid is at the lowest thread on the filler neck, move the tilt control up and down, check the level and, if necessary, repeat until the reservoir remains full or until you've cycled the system four times.

Trim Motor Parts | West Marine

If you have no response or a large spark, then the trim pump motor is bad or the valve body is locked up. You can do this same check with the trim pump motor removed from the valve body to see if it spins. The trim pump valve body is not designed to be serviceable, so if it is bad we would suggest replacing the complete trim pump.
