Sliding / No Separation (Nastran: Slide) With this type of contact the element will act similar to a welded contact element in tension and compression, but will slide in-plane. Friction is ignored for this contact type, so contact data should not include friction settings. Slide contact can be used in linear and nonlinear solutions.

The first book in the series, Getting Started with MSC Nastran User's Guide, is intended for those readers who are unfamiliar with the finite element method, those who have never run MSC Nastran, or those who are interested in a general overview of MSC Nastran's capabilities. It is assumed that you are familiar with the material in Getting Started with MSC Nastran User's Guide and have MSC Nastran available.

Click to Unmute. This opens in a new window. Engineers use MSC Nastran to ensure structural systems have the necessary strength, stiffness, and life to preclude failure (excess stresses, resonance, buckling, or detrimental deformations) that may compromise structural function and safety. MSC Nastran is also used to improve the economy and passenger comfort of structural designs.
