The robotic paths are automatically created after the operator uses a PC to graphically select the area of the part to be painted and chooses the painting method. Next, the paths are validated within PaintPRO or downloaded to the system controller.

RobotWorx - Fanuc PaintPro: Painting Software
PaintPRO is a graphical offline programming tool for path teach and paint process development. PalletPRO simulation software enables a user to completely build, debug, and test a palletizing or depalletizing application offline. With WeldPRO, users can simulate the robotic arc welding process in a 3D space. SpotPRO does the same for spot welding.
